ISTITUTO RICERCHE PROVE ANALISI s.r.l.

25040 BIENNO (BS) - Via Artigiani, 63 - Tel. 0364.300342 - Fax 0364.300354

ORGANISMO NOTIFICATO **CE-0398**

I ns. accessori sono stati testati dall'istituto ricerche prove Analisi di Bienno (BS). Questi test sono stati fondamentali per determinare i carichi che i ns. prodotti possono sopportare. Il cardine inferiore può sopportare una pressione di kg 360, mentre quello superiore una pressione di 240 kg.

The above tests were carried out to determine the maximum weight the hinges would stand. The results were that the 2 inserts bended, without breaking, when the pressure, on the bottom hinge, reached 360 Kg, and 240 Kg on the top.
